# We Don't Just Build Software. We Build Leverage.

Codix - Full-Stack Software Solutions

Codix is a full-stack software solutions company delivering enterprise-grade web apps, AI integrations, and scalable platforms for startups and enterprises worldwide.

From idea to infrastructure – full-stack expertise across React, Node.js, NestJS, cloud, and AI.

# Achievements & Impact

10+

Projects Delivered

Across multiple industries

4

Core Industries

Real estate, fintech, healthcare, e-commerce

10+

Tech Stacks

High adoption & integration rates

Global

Reach

Remote worldwide delivery

## Key Projects & Implementations

### UsaLottomax

Delivered a high-performance live lottery and TV streaming platform, ensuring real-time data synchronization and seamless user experience.

### AqarLink

Developed a comprehensive Property Management System (PMS) rental platform tailored for the real estate industry to streamline operations.

### Trumeid

Engineered a secure KYC and face-recognition system, significantly enhancing identity verification processes for fintech and healthcare.

### Revona

Built a scalable car service platform and comprehensive admin panel, optimizing service delivery and operational management.

# Frontend Development

Pixel-perfect, performant UIs using React.js, Next.js, Vue.js and Nuxt.js – with Tailwind CSS and Bootstrap for responsive design

## TECH STACK

- React.js / Next.js
- Vue.js / Nuxt.js
- TypeScript
- Tailwind CSS / Bootstrap

# Backend API Development

Robust REST APIs and real-time systems using Node.js, NestJS and Express.js with OAuth 2.0, JWT auth and WebSocket integration

## TECH STACK

- Node.js / NestJS
- Express.js
- RESTful APIs
- WebSockets
- OAuth 2.0 / JWT Authentication

# Cloud, DevOps & AI Integration

## Cloud & DevOps

Deploying and managing production apps on AWS (EC2, S3), Vercel, Netlify and Railway with Docker, Kubernetes and CI/CD pipelines

AWS / Vercel

Docker / Kubernetes

CI/CD

## AI Integration & Data

Embedding AI into products — image analysis, SEO automation, LLM integration and data analytics using Python, Pandas and Power BI

AI / LLM Integration

Python / Pandas

Power BI

# Database Management

Schema design, query optimisation and performance tuning with PostgreSQL and MongoDB. Data integrity and efficient indexing at scale.

# About Codix

## Building Products Since 2013, Focusing on Intelligent Automation Since 2018

Led by Muhammad Aun — a dedicated software engineer with expertise in React.js, Node.js, NestJS, and cloud deployments

We partner with startups and enterprises to ship products that actually work

From rapid MVPs to complex platform migrations — we bring engineering discipline, agile thinking, and hands-on experience across industries including real estate, fintech, healthcare, and e-commerce

### Core Values

- **Agile by Default**

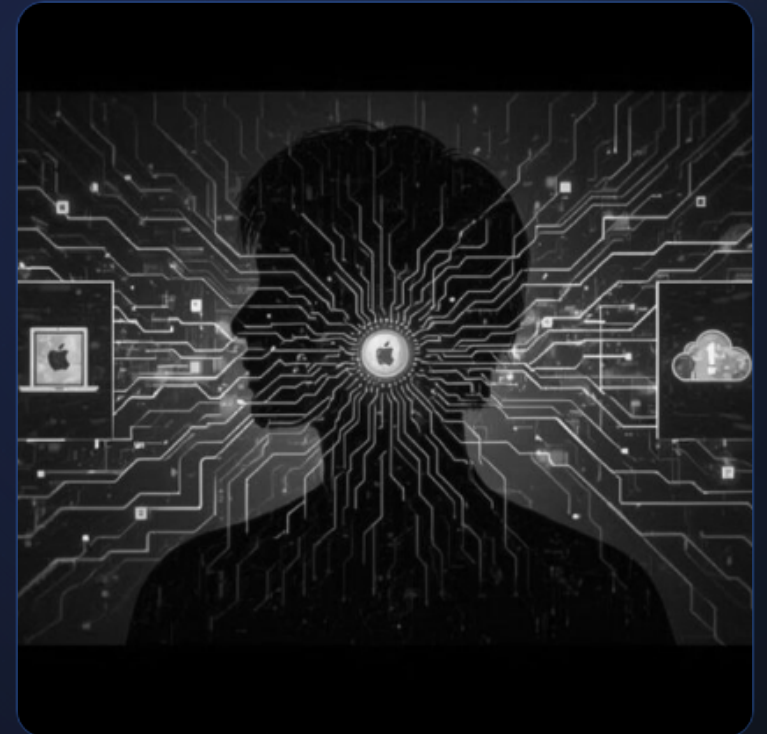

CI/CD, automated testing, and sprint-driven delivery — every project

- **Full-Stack Ownership**

Frontend to backend to database to cloud — one team, end to end

- **Data-Driven Solutions**

We build with analytics, AI, and real-time data at the core

# Development Methodology

## Sprint-Driven Delivery

Agile sprints with integrated CI/CD pipelines for rapid, reliable releases.

## Automated Testing

Comprehensive QA through automated unit, integration, and E2E testing.

## Collaborative Dev

Version control via Git with strict code review and documentation standards.

### Iterative Design & Development Cycle

Planning

Design

Development

Testing

Deployment

- Continuous integration and deployment practices ensure that code changes are automatically tested and prepared for release.
- Rigorous code review processes and comprehensive documentation standards maintain high code quality and system maintainability.

# Our Journey

2023

Joined AccellionX — shipped production apps across Node.js, Next.js, NestJS, Vue.js, React. Worked on Trumeid (KYC/face-recognition), Pitchlane, Lottomax admin, Glass Calculator and more

2024

Delivered UsaLottomax (live lottery + TV streaming), AqarLink (PMS rental platform), Discord Mod Bot, Invoice System, Ice Cream multi-vendor platform and Raap Builder UI

2025

AI + SEO integration (Angular/LLM), full Refine.dev admin panel, Data Analyst role at Excellence Delivered (Power BI, Python, Pandas). Shipped 10+ production projects

Oct 2025

Joined Simula Lab, London — building scalable apps with React.js, NestJS, PostgreSQL, real-time WebSocket APIs, 3rd-party integrations and agile CI/CD pipelines

Now

Currently building Revona (car service platform) and its admin panel. Expanding the stack daily

# Portfolio Showcase

## UsaLottomax

Live lottery + TV streaming platform

Complex real-time streaming integration with secure transaction processing for live lottery events.

## AqarLink

PMS rental platform

Comprehensive property management system handling rentals, tenant portals, and automated billing.

## Trumeid

KYC/face-recognition system

Advanced AI integration for secure identity verification and facial recognition workflows.

## Revona

Car service platform

End-to-end automotive service booking and management platform with custom admin dashboard.

## E-Commerce & Tools

Multi-vendor & Utilities

- Ice Cream multi-vendor platform
- Invoice System
- Glass Calculator

## Platform & Admin

Management Systems

- Pitchlane
- Lottomax admin
- Raap Builder UI
- Discord Mod Bot
